Did you know that the majority of the training we do is not on our monthly calendar, but customized for area companies?

In one month, 52 custom classes were taught at numerous company locations. We can train at any time of the day and cover the subject matter you need - at your location or ours. If you do not have the training space, we do. We have facilities in St. Johns, Clay, Nassau, Columbia & Duval County available.

Let **our** Environmental Health & Safety specialists help you with your training needs. Contact Bruce Press at (904) 399-3119 ext. 127 for more information.

November 1st through January 1st, 2019
